

WINKELMAN SCHOOL

Mobile Modular created a permanent solution for West Northfield School District 31 to maintain manageable classroom sizes.

THE CHALLENGE

Mobile Modular was contacted by West Northfield SD 31 in February 2018 to provide a proposal for a permanent space solution. Previously, they were accommodating expanding programs that required additional space to maintain small classroom sizes and wanted to add an FT Kindergarten, teacher workrooms, meeting space, and preschool services provided by the regional Special Ed district.

Customer Name: West Northfield School District 31

Project Location: Glenview, IL

Building Type(s): Modular Classrooms

Module Count: 10

Total Sq. Ft: 9,588 sq. ft.

THE SOLUTION

Mobile Modular provided a 9,588 sq. foot, 10 module building with a convenient 12'x 64' modular connector, to allow direct access to the existing building.

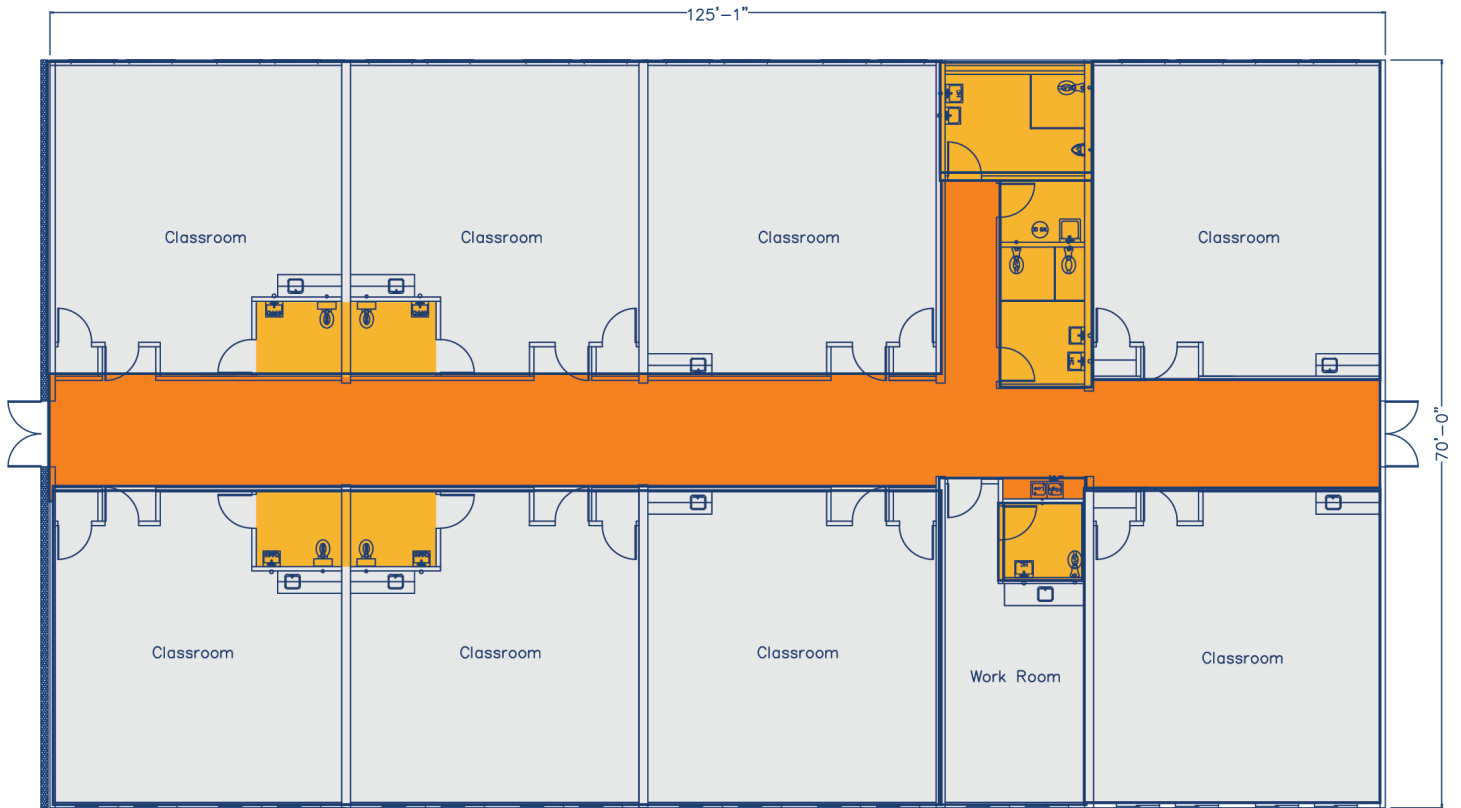

Their goal was to add these facilities during the 2018 calendar year. A full brick exterior, approved by the local appearance commission, was installed on-site and the modular addition blends seamlessly with the existing school.
