## **ANNOUNCEMENT**

Mobile/Modular Express, a Maryland-based manufacturer of Commercial Modular Buildings, is proud to announce the acquisition of certain assets of Miller Building Systems. The acquisition includes the manufacturing facilities located in Leola, Pennsylvania and Elkhart, Indiana. The newly acquired facilities will be operated in conjunction with our current operation in Edgewood, Maryland.

The experience of our personnel and the state-of-the-art production facilities make Mobile/Modular Express one of the most capable manufacturers of Office Trailers and Commercial Modular Buildings in the United States.

In addition to our current product line of wood and steel-framed structures, we now have the capacity to offer non-combustible and concrete construction for a wide variety of applications. The manufacturing facilities are strategically located to minimize the shipping costs to major population centers in the geographic areas that they serve.

Our engineering capabilities provide efficient designs, and our sales department offers value engineering opportunities that fulfill the needs of the customer, while maintaining quality and minimizing cost.

We are open for business and ready to provide you with competitive pricing, on time deliveries and a level of service that is second to no one.

Kenneth L. Zuromski
