

CITY OF GAINESVILLE FIRE AND RESCUE

Mobile Modular provided the city of Gainesville with a fully functional, brand-new fire station that met the community and architectural board needs.

THE CHALLENGE

In order to accommodate the massive population growth occurring on the east side of the City of Gainesville known as Butler Plaza, the Gainesville Fire Department had to build a brand new Fire Station.

THE SOLUTION

Gainesville Fire Rescue found Mobile Modular through an existing customer, the Alachua County School Board. GFR was in need of a permanent fire station that would blend in with the architectural review requirements of Butler Plaza.

Mobile Modular designed the building to fit the needs of the fire station, the community, and the Butler Plaza Architectural Review Committee. The building was fully operational on September 5, 2017.

Customer Name: City of Gainesville

Project Location: Gainesville, FL

Building Type(s): Modular Government

Module Count: 3

Total Sq. Ft.: 2,460 sq. ft.
