

66 MODULAR CLASSROOMS IN 24 MONTHS

Mobile Modular delivers modular education solutions to Chesterfield County Public Schools

THE CHALLENGE

As part of a plan to renovate existing school campuses, Chesterfield County Public Schools required two sites to house two elementary schools for 24 months. Thanks to our readily available inventory of modular classrooms and restroom buildings, comprehensive oversight, and ability to complete the project within an aggressively tight time frame, Mobile Modular won the bid.

THE SOLUTION

The installation needed to be prepared for the students by Labor Day with a certificate of occupancy from the County. In the end, 117,000 square feet of space was provided, which consisted of 66 modular classrooms and two cafeteria spaces. Thanks to our flexible ModPod fleet of classrooms, which are quickly available without the need for typical factory lead times, Mobile Modular delivered the project on time. At each site, we installed:

- Six 182 x 65 12-classroom ModPods with restrooms
- Three 154 x 65 10-classroom ModPods with restrooms
- Two 60 x 60 MPLEX buildings to be used as cafeterias
