

SWIFT EDUCATIONAL CONTINUITY IN THE WAKE OF HURRICANE IAN

See how Mobile Modular & Cotton Logistics quickly set up schools in Florida post-Hurricane Ian, getting students back in the classroom.

THE CHALLENGE

In the aftermath of Hurricane Ian in 2022, Lee County was left with a significant challenge. The storm had severely damaged the local school infrastructure, making many buildings uninhabitable. With the school year already underway, the county faced the urgent task of finding a way to continue education for countless students without delay.

THE SOLUTION

Cotton Logistics partnered with Mobile Modular to quickly set up a temporary educational campus for displaced students. They deployed 73 modules, creating over 38,000 square feet of classroom and office space, using in-fleet assets. Despite time constraints, both teams worked tirelessly, even through Thanksgiving, to finish by early December 2022. Mobile Modular provided the units, while Cotton Logistics managed on-site services like electrical and plumbing. This project's success demonstrated modular construction's effectiveness in emergencies, ensuring uninterrupted education in Lee County. It also showcased the community's resilience and the collaborative efforts of Cotton Logistics and Mobile Modular in disaster recovery.

Customer Name: Cotton Logistics

Project Location: Lee County, Cape Coral, FL

Building Type(s): Disaster Recovery, Education

Module Count: 73

Total Sq. Ft: 38,000 sq. ft.
