

ST. CLOUD VA MEDICAL CENTER

Mobile Modular helped St. Cloud VA Medical Center expand its Primary Care Service line to provide more health care services to veterans in Minnesota.

THE CHALLENGE

They required a turnkey solution and had a stringent 120-day construction timeline. With specific needs that included; 16 additional Exam Rooms, a Nurse's Station, a Reception Area, IT and mechanical Rooms, Medical Storage Rooms, and Storage/Supply rooms, modular buildings were a viable solution. The St. Cloud VA Hospital Historic District was placed on the National Register of Historic Places on August 21, 2012, because of its significance to the history and evolution of American medicine and Veterans care, its representation of World War I-era federal architecture, and its role in providing quality health care to World War I Veterans after the war. Due to being on the National Register, the project required the space be leased on a 1 to 5-year basis. Additionally, the project required it be 100% set aside for a Service-Disabled Veteran-Owned Small Business (SDVOSB). With all factors carefully considered, the bid was secured to proceed with the project.

Customer Name: St. Cloud VA Medical Center

Project Location: St. Cloud, MN

Building Type(s): Modular Healthcare

Job Type: Lease

Total Sq. Ft: 5,335 sq. ft.

THE SOLUTION

As a Certified SDVOSB, Versacon, Inc. was able to bid on the project and chose to work exclusively with our team, which provided the finished modular building. With experience on past projects with St. Cloud VA Medical Center, Versacon acted as the general contractor and was able to meet the required project specifications.
