

# TEXAS CHARTER SCHOOL EXPANDS BY 20%

Mobile Modular delivers portable classrooms as an affordable solution to accommodate 20% growth at a Texas charter school.

## THE CHALLENGE

In order to meet the needs of the growing student population, the charter school decided to purchase portable classrooms. However, due to the school's location in Brownsville, Texas, the delivery of the classrooms proved to be a logistical challenge. The school's leadership team worked with the delivery company to ensure that the new classrooms were delivered and installed on time. The school was able to successfully accommodate the increased enrollment and continue to provide a high-quality education to its students.

## THE SOLUTION

Mobile Modular suggested our standard 32' x 64' double classroom product for the school's needs. These modular construction units provide two 24' x 32' classrooms with an interior partition, offering flexibility, quality, and easy installation. After obtaining necessary permits, the units were transported safely from Houston to Brownsville. The school qualified for Mobile Modular's Charter Starter program, receiving a \$1,000 credit towards lease and installation costs. The classrooms were installed in time for the start of the school year, meeting educational requirements and budget needs.
