HYBRID

Complex

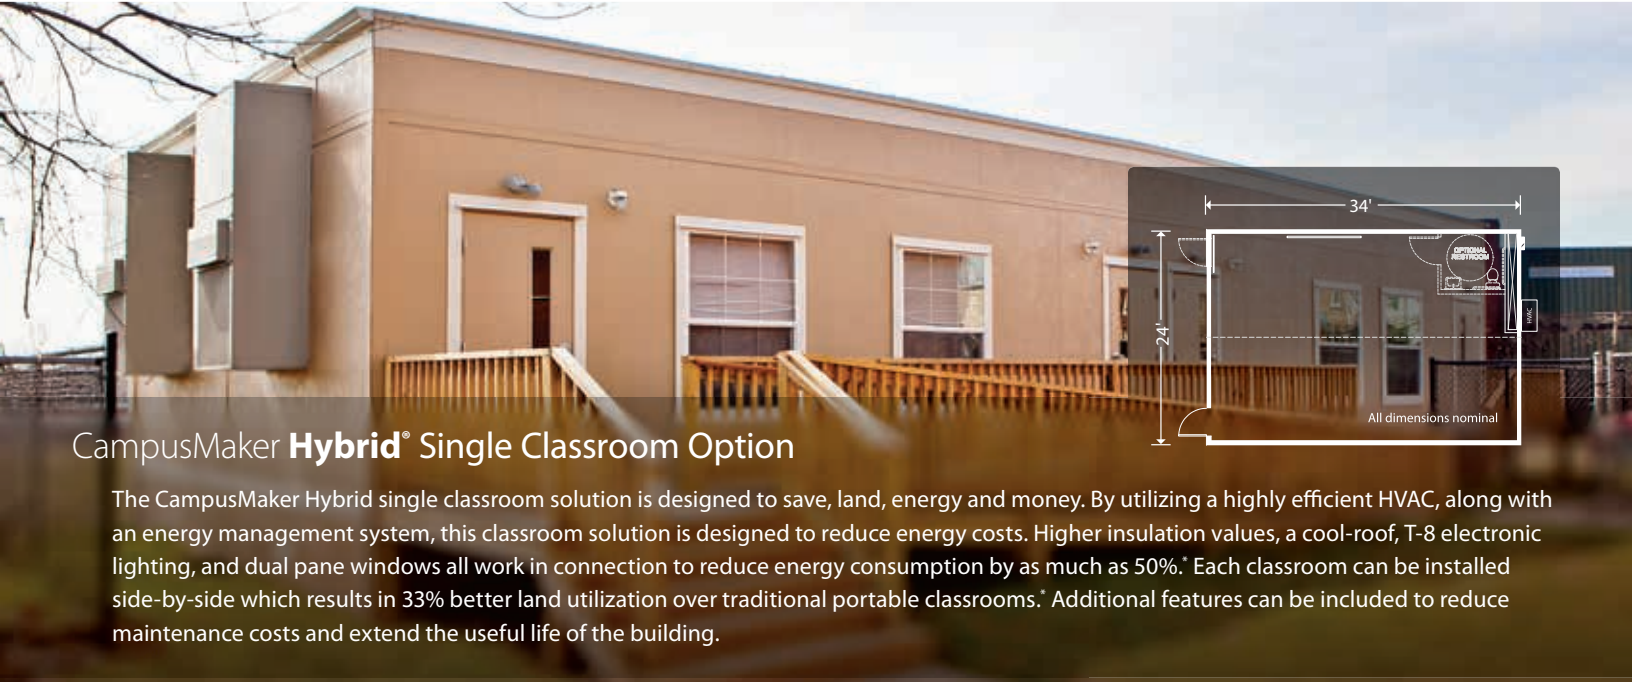

PRO

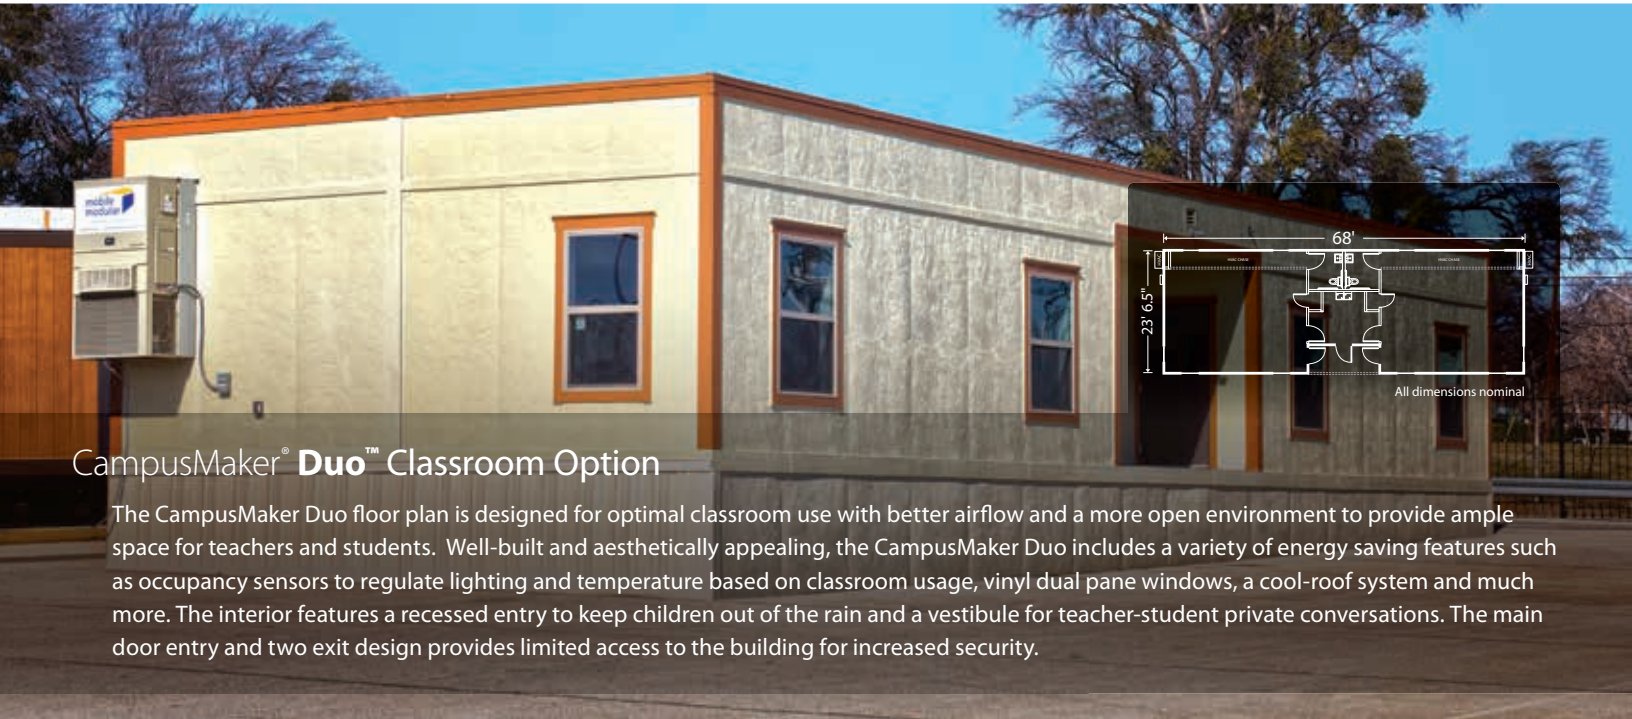

State-of-the-art **eco-friendly modular classrooms**

### CampusMaker **Hybrid**® Single Classroom Option

The CampusMaker Hybrid single classroom solution is designed to save, land, energy and money. By utilizing a highly efficient HVAC, along with an energy management system, this classroom solution is designed to reduce energy costs. Higher insulation values, a cool-roof, T-8 electronic lighting, and dual pane windows all work in connection to reduce energy consumption by as much as 50%.<sup>\*</sup> Each classroom can be installed side-by-side which results in 33% better land utilization over traditional portable classrooms.<sup>\*</sup> Additional features can be included to reduce maintenance costs and extend the useful life of the building.

### CampusMaker **Duo**™ Classroom Option

The CampusMaker Duo floor plan is designed for optimal classroom use with better airflow and a more open environment to provide ample space for teachers and students. Well-built and aesthetically appealing, the CampusMaker Duo includes a variety of energy saving features such as occupancy sensors to regulate lighting and temperature based on classroom usage, vinyl dual pane windows, a cool-roof system and much more. The interior features a recessed entry to keep children out of the rain and a vestibule for teacher-student private conversations. The main door entry and two exit design provides limited access to the building for increased security.

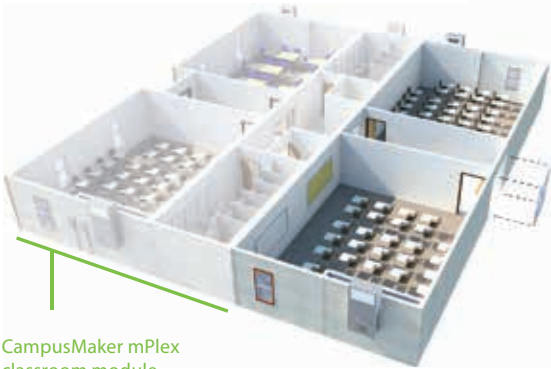

The CampusMaker family of products are not only sustainable, but economical compared to permanent construction. Our eco-friendly classrooms offer today's best match of utility savings and long term durability.

- Reduce cost – save money with scalable classroom solutions and energy efficiency
- Innovative design – flexible learning space for every application
- Optimal learning – high-performance teaching environments

## CampusMaker® mPlex™

The CampusMaker mPlex delivers an optimal learning environment offering security, energy efficiency and a building design that can be adapted to fluctuating enrollment needs. Sustainable and customizable, this multi-classroom option can be configured into a variety of self-contained complexes including restrooms, administrative offices, libraries, laboratories, music classrooms and more.

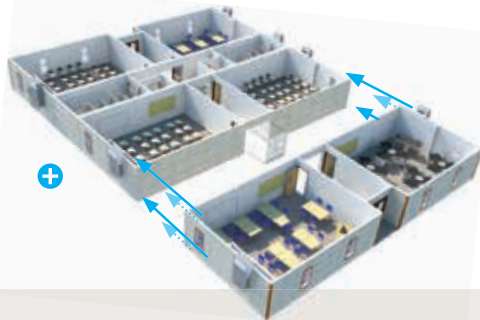

CampusMaker mPlex classroom module

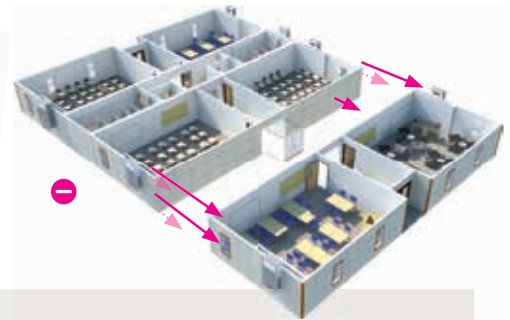

Additionally, the CampusMaker mPlex offers a comprehensive selection of options to meet even the most stringent specifications.

### Four-classroom configuration

To adjust the size of the CampusMaker mPlex the two-classroom module at either end can be detached and relocated to another site or school. Construction of a new exterior wall is not required, as the wall and finishes are already in place. This feature minimizes downtime and disruption to the remainder of the complex during construction.

Add an additional classroom module

Retract a classroom module

By simply removing and relocating the existing security entrance doors to the newly expanded CampusMaker mPlex, this classroom complex is set to operate with six classrooms, a restroom module and a corridor. This work can be completed with minimal disruption to occupants, and in most cases, within just a few days.

Each classroom accommodates up to 32 students. The interior corridor is 8' 0" wide and enhanced with a one-hour-fire-rated construction. Sprinklers can be installed for additional protection.

\*The cost comparison is an average annual energy cost savings in the cities of Atlanta, GA, Charlotte, NC, Raleigh, NC, Baltimore, MD and Richmond, VA. Traditional portable classrooms require a minimum of 10' 0" separation between classrooms.

## Portable Restroom Buildings

Mobile Modular offers high-quality and clean restroom facilities. Each building is delivered directly to your job site ready for installation and use.

- Facilities serving from 10 to 300 users
- Access ramps, landing and stairs available
- Exhaust systems
- Privacy partitioning
